## **POEWIT ANNOUNCES INTEGRATION WITH CONTROL4**

*PoE Lighting Solutions for the high-end home*

FORT LAUDERDALE, FL, May 25<sup>th</sup> | PoEWit Technologies Inc., a leading manufacturer and designer of smart PoE lighting and custom A/V network solutions, announced today that their new, highly anticipated Control4 driver is now available. Now, all PoEWit lighting can be managed from your Control4 panel. Set your lights on a new schedule, or add them to your existing Control4 schedules.

PoEWit Cloud PoE Security Lights are becoming the new essential addition to every outdoor security camera installation. PoEWit security lights turn on dimmed to provide ambiance to a home's perimeter. When motion detectors are triggered, the lights brighten to scare off intruders and enable security cameras to record in high-resolution color. With PoEWit's PoE Pass-Through technology, anyone can retrofit a security camera installation.

"All of PoEWit's PoE smart lighting can be individually controlled and programmed to react to events automatically, including power outages," said Dusan Jankov, Co-CEO of PoEWit. "With the Control4 driver, PoEWit's PoE lighting can be added in key locations such as stairwells and hallways to provide a safe path to exit a home. All you need is a single Cat5/6 cable."

You can learn more about PoEWit's PoE Security Lighting solutions at <https://www.poewit.com/outdoor-security> and PoEWit's PoE Recessed Lighting solutions at <https://www.poewit.com/residential>.

About PoEWit Technologies:

PoEWit's goal is to advance a home's or building's electrical and network infrastructure so that sophisticated digital devices can be easily installed anywhere and perform more reliably. We want every device to be networked and powered in an efficient, smart, and safe manner. Our solutions are sophisticated Power over Ethernet (PoE) devices for the high-end residential and commercial automation markets. Our products are exclusively sold through our dealer network. We are headquartered in Fort Lauderdale, Florida.
